A Great Financier.

A man who occupied a little back room in a poor quarter of the east end of London was evicted for nonpayment of rent. He had nothing but a value and a few clothes, and while they were throwing him and his belongings out of the house a bulky manuscript fell out of his pocket. Nobody noticed it at the time, but after be had gathered his clothes and taken his departure one of the hystanders saw the big roll of paper, picked it up and on opening it was surprised and amused to find it contained an elaborate scheme, worked out to the idautest degree, for refunding the national debt of the firstist empire.

The Temperance Pledge

More than 600 Berea students signed the Temperance Pledge two weeks ago.

It was something like this:

"I promise, God helping me, to abstain from the use of all intoxicating liquors as a beverage, and to persuade and encourage others to abstain."

That kind of a pledge has saved thousands and thousands from a drunkard's grave. In fact it has saved all who have taken it in sincerity.

And it saves one from a great deal of fighting and questioning. The pledged man has decided in advance. He does not have to fight a battle every time the bottle appears. He has settled that question. His reply is ready-" I never drink."

And it should be noticed that this is a pledge that holds through life. If a man does once, in a moment of forgetfulness and folly, violate that pledge, the devil often tries to make him think that a pledge once broken is no longer binding. This is not true. The pledge comes right back as strong and as good as ever—"I have promised to abstain."

And one thing more. Most people who drink do so because they are not trained to enjoy the real and great pleasures of life-they do not enjoy reading, music, friendship and the gladness of doing things worth while. Many of them are woefully sad and disheartened beings. Others are simply "light headed" and heedless. It is everybody's business to promote and encourage all the innocent pleasures of life. Let us make friends with those who have been entangled in the seductions of the bottle, and get them excited with religion and the proper work and joy of living.

HUMANS AS BAROMETERS

Many human beings are notoriously sensitive not merely to the weather of today, but also to the weather of tomorrow. Arthritic, rheumatic, and neuralgic patients-need no harometer or weather map to tell them when bad weather is approaching Old wounds give trouble at such a time, and mem bers long since amputated reassert their power to cause pain. These phenomena are so well known that It would be sheer fatulty in any scientific man to deny them, merely because he cannot understand them; yet, strangely enough, they have been the subject of very fittle aystematic inveatigation. A special case under this general head is the extreme sensitiveness of some persons to the approach of thunderstorms. The pathological condition experienced by such persons before a thunderstorm must not be confused with ordinary dread of thunder and lightning. In fact, this condition often comes on before there are any ordinary indications of the "Surest thing, you know. If there is such a thing as .. divine call to earthly workers, why should it be a monopoly to ministers? There are thousands of chaune's of good besides the pulpit, and it is reasonable that those who labor in them should be now and theu divinely endawed for their work. There have been rulers divinely ordained. There are teachers nut a few, who same of them in inconspicuous places, who seem divinely fitted for their work. There are writers who have guarded their taient as a sacred responsibility; there ara physicians who rise far above commercial influences and render priceless service to mankind-who, whether conscinus of it or not, are as firmly consecrated to the working of good as if they were in the pulpit. Any womun may hear a child, but not every woman by any means is fitter to be a mother in the highest sense. Poultry Haad Louse. The hend louse attacks young

chicks generally before they are feathered out, and is first found on the head with its claws or feeders sunk into the skin of the head. As they become more numerous, they attack the throat and neck as well. The remedy la simple, but it takes a little time. Each chick must have its head greased with lard, cottonseed oil or offvo off. You will have to look closely to see these insects. They are very destructive to chickens and must he controlled or exterminated if the chick is to be healthy .- A. C. Smith.

GEESE ARE LUCRATIVE NEEDED BY GROWING CHICKS

Green Stuff and Grit Ars Absolutsly Necessary for Growth and Stamina -Cause of Runts.

It has been repeatedly proven by continuous experiments at government experiment stations, and in private brooding houses by experienced breeders that the value of green stuff and grit for growing chicks cannot he overestimated. in fact, these two common articles are shaolutely necessaly for growth and stamina.

Some people say that they cannot get green stuff, and when we go in their yards later we see a lot of presumably healthy chickens, but tha size for age and breed is far below the pornial, for the simple reason they have stopped growing at the critical period for lack of greens, and probably that lack is more the cause of runty specimens than any other part of the management,

As to grit every one should be able to aupply that from even a gravel pile, if commercial grit is not convenient. flut the latter is the finest for the purpose of teeth in the chicks, then the feed will be ground fine and essimilated in the system, and the chicks will grow naturally ned be n sight to prove the value of both necessery srticles.

BEST RESULTS IN SCALDING

To obtain the hest result, the scalding of poultry is something that must be done with the greatest care. Overscalding makes an unattractive carcass. The water should he just to a bolling point, but not actually holling before the hirds are immersed. In doing this, it must not he forgotten the operator must hold the hird hy the lega and head and then lift up and down in the water three or four times, when all feathers and pin-feathers should be removed very cleanly without breaking the skin. All scalded poultry should he "plumped" after picking by dipping for about two seconds in very hot water-just under boiling point-and then thrown into cool water of the natural temperature, where it should he allowed to remained for 15 to 20 minutes.

CLAIMS FOR THE ROAD DRAG

Really Holding Back Construction of Good Rosds, as Many Believs No Work Is Needed.

In an article on "Split Log Drug and tiow to t'se it to Obtain Best Results," Mr lioward ii. Gross, among other things, says:

"A good road is one that is good and serviceable 365 days in the year. a road whereon one may ride or drive with pleasure or have full load without strain upon the horse, vehicle or harness.

"To do this the road must have a hard, smooth surface and offer the minimum of resistance.

"An earth road may he an excellent one today and tomorrow a very bad one. It may be a delight in June and a tright in March. Such roads have the virtue of a halky horse, they are liable to fall when most wanted.

"The extravagant claims that have heen made for the road drag are really holding back the building of good roads. Many have believed that att that was required to have good roads

POOR ROADS ARE EXPENSIVE

Amarican Farmer Paya 25 Canta Mils Per Ton for Carrying Farm Prod-

There are 2,300,000 miles of public roads in this country. Only 150,000 miles, or 7 per cent., are improved All the rest can be fairly described as bad roads. The waste of our natural resources, reckless as it is, is nothinf compared to the money wasts brought about hy this condition of our highwaya,

it costs the French peasant an av eraga of 12 centa a mile per ton to haul his produce to market. It coats the American farmer an average of 25 centa a mile per ton, or 100 per cent. mora than the Frenchman. During the year 1905-1906 hauling of farm produce to shipping points ercise throw some ears of corn into amounted to hetween forty and fortyfive million tons weight. The average haul was 9.4 miles, if the farmers could have done their hauling over French roads, instead of their own inferior ones they would have netted \$58,900,000 more on their cropa.

But all the hauling to shipping points is not done by farmers by any means. The interstate commerce commission tells us that in all something like 250,000,000 tone are hauled for shipment svery year. The willingness to move this immense volume of freight over poor roads, as against good roads such as Francs enjoys, coats the country a cool unnecessary \$305,000,000 a year.

These figures and facts come from the office of Logan Waller Page, the United States director of public works.

BONDS IN NEW YORK STATE Second Issua of \$50,000,000 Was Graatast Thing in Good Road History

The greatest thing in good roads history in 1912 was the action of New York in voting a second state bond issue of \$50,000,000. There was some opposition to the proposition, but it went through with a good majority. New York has ied all other states in road improvement. Under the act of 1906 It issued \$50,000,000 worth of road bonds. This it spent at the rate of about \$5,000,000 a year. With what has been spent and with contracts made tha whole sum has been diapoaed of, and so the new \$5,000,000 comes in to continue the work. Thesa buge huma have enabled New York to more than double her mileage of improved roads and to project large plans for trunk lines. Incidentally, it means an increase in the direct tax of about \$2,500,000 yearly.

WATCHFULNESS.

(Temparance Lesson.) LESSON TEXT-"Luke 12 35-48.
GOLDEN TEXT-"Riessed are those servants whom the Lord when he cometh shall find watching."-Luke 12 37.

The words of Jesus are the greatest. authority the believer has upon which to found his belief in the Second Com-Some refuse to have much to do with this important theme because others have perverted it or else "overly emphasized it" yet in the 260 chapters in the New Testament there are 318 distinct references to this theme, a far greater proportion than is placed upon some of the doctrines upon which whole denominations have been found-

Relativa Value.

I. The exhortation to watch, vv. 35-This is the heginning of a new parngraph. Jesus has been showing the relative value of material possessions and the Kingdom of God and epitomizes his teaching in v. 34. He now sets before his disciplines what shall their nttitude towards him during his absence (II. Pet. 3:11, 12 R. V., Titus 2:13; 11. Tim. 4:8). Thus to be watchful seems to contradict his suggestions about abxlety. We need to remember, however, that the child of the Kingdom is in entirely new relationship with the world. His desire is not for self enrichment hut rather to be in such relations with God as his rights demand and thus to bring to others their highest good. This parable epitomizes opportunity. Rightly to make use of none's opportunities apelis happiness for the disciple when he the king shall appear. The evidence that we are watching for his appearing consists of the resdiness of the individual who is or is not watching. v. 35; 1. Pet. 1:13. Jesus knocks at the individual heart (Rev. 3:20) but when he comes 'twill be to he present at a feast, v. 36. We cannot contract this time and there is no call to service tomorrow. Lions girt, ready for the hattie or for the race, and lamps hurning, (light is always the result of something being consumed), are today's visthie evidence of continuous service.

Peter'a Quantion. The axplanation to Pater, vv. 41-48. Between this parable and the one which follows, Peter Interrupts hy asking the question, "Lord, speakest thou this parable unto us, or even unto all?" That which follows is his answer to that question but it is also a continuance of the teaching just given. In this part Jesus refers to stewards (bond-servants) that it is their supreme business to seek the Kingdom hy aelling in order to give. The one work of a servant is to give to the members of an household, each in dus aesson his portion of the father's bountiful grace. John 21:15-17: I. Pet. 5:2; Jer. 3:15. There are many deceltful servants who first feed themselves, or feed only a portion of the household, or who feed chaff rather than bread, even the true bread of life. I. Pet. 2:2; 4:10, 11. Jesus teaches us that each bond-servant shall fikewise be judged and that suddenly.

III. The exhertation. Jesus Christ here presents to us the fact that we abali ali be judged. That the measure of our reward or of our punishment is dependent upon the measure of our knowledge and of our opportunity, James 4:17. To him to whom much is given, of him shall much be required. Onr present responsibility is that of being ready for the coming of the King and of his Kingdom. The expression of that readiness is evidenced by our lives of service. There are of course many other phases of service not included in this parable, but our Lord is emphasizing opportunity, stewardship, service, watchfulness. In order to fuifili our service we must enter into fellowship with the king in his reign, and those who enter into that fellowship, who are faithful, he will reward vv. 37, 48. The measure of our punishment is conditioned upon the measure of our knowledge (v. 48) and our knowledge can be enlarged as we use our opportunities.

IV. The Gelden Taxt, (v. 37). Is intended to fix our attention upon the acts of our Lord when he shall return. It accema astonishing that he shall compel those whom he finds watching to seat themselves that he may gird himself and serve them. Here we gird ourselves that we may serve him hy serving others (Matt. 25:40). But in that tomorrow the day of his victory, he will gird himself and serve those who have been watchfulness and obedient aervants. This is a suggestion of the exceeding grace mentioned by

the Apostie Paul, Rom. 11:33. V. The Temperance Lasson is suggested by the conduct of those who are not watching for the King's appearing (v. 45). They were indulging in the animal pleasures of the moment. The Kingdom of God is not in eating and drinking but consists of righteousness and peace and joy in the Holy Spirit, Rom. 14:17. The effect of intemperance on the death rates, on the next generation, from an economic standpoint or viewed from any nugle. is only the result of the most criminal shortsightedness. A clear apprehension of the fact of the imminence of his return would change all lives.

There's old man Everdean alive and competent to testify. There's John Thayer's will on fle over to Orbam. I'roofs! Why, you thief, if it's proofs you want I've got enough to send you to state prison for the rest of your life! Don't you dare say 'proofs' to me again! Ifeman Atkins, you owe me, as Bos'u's guardian, \$37,500, with interest since 1854.

What you goin' to do about it?" Here was one ray, a feeble ray, of light.

"You're not her guardian," cried Atkins. "The courts have thrown you ent, and your appeal won't stand elther. If any money is due it belongs to ber father. She isn't of age! No. sir, her father"-

Captain Cy's patience had been giv- to reveal this-this"-He strode across the room and shook his forefinger in his victim's face.

'So!" he cried. "That's your tack. is it? By the big dipper, you go to her father-just you go to him and tell bim! Just bint to bim that you owe his daughter thirty-odd thousand dollars and see what he'll do. Good heavens above, he was ready to sell her out to me for \$50 wuth of sand bank in Orham-almost ready, he was, till you offered a higher price to him to aght. Why, he'll have your bide nailed up on the harn door! If you don't pay him every red copper down on the nall he'll wring you dry. And then be'll blackmail you forever and ever. amen-unless, of course, I go home and stop the blackmail by printing my atory in the Rreeze. I've a precious good mind to do it. By the Almighty. I will do it unless you come off that high borse of yours and talk like a man.

And then the monument fell-fell proatrate, with a nickly, pitiful crash. If we of Itayport could have seen our congressinan then! The great man. great no longer, broke down completely. He cried like a baby, it was all true-all true. He had not meant to

steel at first. He had been led into using the money in his business. Than he had meant to send it to the heirs, but he didn't know their whereabouts. Captain Cy amiled at this excuse. And now he couldn't pay-he couldn't. He had hardly that sum in the world. Ha had lost money in stocks. His proporty in the south had gove to the bad. He would be ruined. He would have to go to prison. He was getting to be au old mau. Aud there was Alicia, his daughter! Think of her! Think of the disgrace! Aud so on, over and over, with the one recurring burden-what was the captain going to do-what was he going to do? It was a miserable, dreadful exhibition, and Captain Cy could feel no pride in

ble triumph. There, there!" he said at last, "Stop it, man; stop it, for goodness sakes! Pull yourself together. I guess we can dx it up somehow. I ain't goin' to be too hard ou you. 'If it wan't for your meauness in bein' willin' to let Boa'n ouffer her life long with that drunken benst of a dad of hers 1'd feel almost like tellin' you to get up and forget it. But that's got to be stopped. Now, you

listen to me." Heman listened. He was on his knees beside the bed, his face buried Honorable Atkins to walk down that

feonine Atklus hair, which he was wont to toss backward in the heated periods of his eloquence, tumbled and draggled. I'nptain Cy looked down at

"This whole business about Bos'n must be stopped," he said, "and stopped right off. You tell your lawyers to drop the case. Her dad is only bangla' around because you pay him to. He don't want her; he don't care

what becomes of her. If you pay him enough he'll go, won't he, and not come back?"

The congressman raised his head. "Why, yes," he faltered; "I think he will. Yes, I think I could arrange that, But, I'yrus"-

The captain held up his hand, "I intend to look out for Bos'n," he said. "She cares for me more'n any one else in the world. She's an much to me as my own child ever could be, and I'll see that she is happy and provided for. I'm religious enough to be fleve she was sent to me, and I intend to atick to my trust. As for the

nioney"-"Yes, yes-the money?" "Well, I won't be too hard on you that way, either. We'll talk that over later on. Maybe we can arrange for you to pay it a little at a time. You can sign a paper showin' that you owe hands. 'Tain't as if the child was in want. I've got some money of my we needn't worry about the money

"God bless you, Cyrns! 1"-"Yes, all right. I'm sure your askin' for the blesslit 'll be a great help. Now, you do your part and I'll do mine. No one knows of this business but me. i didn't tell Everdean a word. He don't know why I hustled out there and back nor why I asked so many questions. And he ain't the kind to pry into what don't concern blm. So you're pretty safe, I cal'late. Now, if you don't mind, I wish you'd run along home. I'm-I'm used up. sort of."

Mr. Atkins arose from his knees. Even then, broken as he was-he looked ten years older than when he entered the reeni-he could hardly believe what he had just heard.

"You mean," he faltered-' Cyrus, do you mean that-that you re not going

That I'm not goin' to tell Ynp; that's what I mean. You get rid of Thomas and squeich that law case and i'll keep mum. You can trust me for that."

"But-but, Cyrus, the people at home? Your story in the Breeze? You're not"-

"No; they needn't know, either. It'll be between you and me.'

"God bless you! I'll never forget"-"That's right. You mustn't. Forgettin' is the one thing you mustn't do. And, see here, you're boss of the political fleet in Bayport; you steer the school committee now. I'hoebe Dawes ain't too popular with that committee. I'd see that she was popularized."

"Yes, yes; she shall be. She shall not be disturbed. Is there anything else I can do?" "Why, yes, I guess there is. Speakin'

of popularity made me think of it. That harbor appropriation had better go through." A very faint tinge of color came into

the congressman's chalky face. He hesitated in his reply. "I-I don't know about that, Cyrus,"

he said. "The bill will probably be roted on in a few days, it is made up and"-

Then I'd strain a p'int and ntake It over. I'd work real hard on it. I'm sorry about that sugar river, but I cal'laia Bayport 'll have to come firet. Yes, It'll have to, Heman; it sartin

man. "Thank you, Cyrus. You have been more merciful than I had a right to expect."

"Yes, I guess I have, Why do I do it?' He smiled and shook his head. "Well, I don't know. For two reasons maybe-first, I'd hate to be responsible for tippin' over such a sky towerln' idol as you've been to make ruins for Angle I'hinney and the other blackbirds to peck at and caw over, and, aecond-well, it does sound prenumin', don't it? But I kind of play you. Say, Heman." he added, with a chuckle, 'that's a kind of distinction in a way, ain't it? A good many folks have burrahed over you and worshiped you. Some of 'em, I guess likely, have envied you; but, by the blg dipper, I do believe i'm the only one in this round world that ever pitled you! Goodby!

The elevator's right down the hall." It required some resolution for the in his arms, and his gray hair, the corridor and press the elevator button But he did it somehow A guest came out of one of the rooms and approached him as he stood there. It wan a man he knew Heman squared his shoulders and set every nerve and muscle

"Good evening, Mr. Atkins," said the man. "A ansemble night, isn't it?" "Miscrable, indeed," replied the congressman. The strength in his voice

surprised him. The man passed on Heman descended in the elevator and walked steadily through the crowded lobby and out to the curb, where kis call was waiting. The driver noticed notiging strange in his fare's appearwhen the Atkins residence was reached and its tenant mounted the stone steps and opened the door with his intchkey. lint when tomorrow came news of any kind was unobtainable. No trains could get through, and the telephone and telegraph wires were out of commission owing to the great storm. Hayport was impled under a white coverlet three feet thick on a level, which shone in the winter sun as if powdered with diamond dust. And at 8lumons' and-more wonderful still- at Tad Simpson's burber shop plans were being unde and perfected for proceedings in which t'yrus Whittaker was to

play the most prominent part. Meanwhile the convalescence went on at a rapid rate. As soon as he was permitted to tick Captalu Cy began to question his inwyer. How about the appeal? Had Atkins done any thing further? The nuswers were sat isfactory. The case had been dropped the Honorable Heman had announced its withdrawal. He had said that he had changed his usind and should not continue to esponse the Thomas cause. In fact, he seemed to have whirled completely about on his pedestal and. like a compass, now pointed only in one direction-toward his "boybood

friend" and present neighbor, Cyrus Whittaker. "It's perfectly antounding," commented Peabody. "What in the world,

captain, did you do to him while you were in Washington?" "Oh, uothin' umch," was the rather

disinterested answer. "Him and me had a talk, and he naw the error of his ways, i caillate. How's itos'n today? Did you give her my love when you phoned?" "So far as the case is concerned."

went on the lawyer, "I think we abould have won that, anyway. It's a curious thing. Thomas has disappeared. How he got word or who he got it from I don't know, but he must have, and he's gone somewhere, no one knows where. And yet I'm not certain that we were on the right traff. It seemed certain a week ago, but

He was thinking. Thomas had gone, had he? Bood! Heman was fiving up to his promises. And Hos'n, God bless ber, was free from that danger. "Have you heard from Emmle?

The captain had not been listening

He was sick of the whole bustbess, he dechired, and now that everything was all right didn't wish to talk almost it again. He asked nothing about the appropriation, and the lawyer, acting under strict erders, did not mention it.

Only once did l'aptain Cy laquire concerning a person in his home town who was not a member of his house hold.

"How is er how's the teacher?" inquired one morning. "How's whe?"

"Why, Phoche Dawes, the schoolteacher Snart, is she?"

"Yes, Indeed Why, ahe has been The doctor come in just thea, and the interview terminated. It was not

He was in good spirits, teo, at times, but had fits of seeming depression which under the circumstances were nnexplainable. The doctor thought they were due to his recent illness and forlade questioning.

The original plan had been for the captain to go to Bayport in the train but the morning set for his departure was such a beautiful one that Mr. Peabody, who had the day before return ed from the city, suggested driving over. So the open engrisge, drawn by the feabody "span," was brought around to the front steps, and the captain, bundled up mutil, as he said, he felt like a wharf rat inside a cotton bute, emerged from the house which had sheltered him for a weary mouth

Questions Answered

BEREA, FRIEND OF WORKING STUDENTS. Berea College with its affiliated echools, is not a money-making institution. It requires certain fees, but it expends many thousands of dollars each year for the henefit of its etudents, giving highest advantages at lowest cost, and arranging as far as possible for students to earn and save in every way.

OUR SCHOOL IS LIKE A FAMILY, with careful regulations to protect the character and reputation of the young people. Our students come from the best families and are earnest to do well and improve. For any who may be sick the College provides doctor and nurse without extra

All except those with parents in Berea live In Coilege buildings, and many assist in work of boarding hail, farm and shops, receiving valuable training and getting pay according to the value of their labor. Except in winter it is expected that all will have a chance to earn a part of their expenses. Write to the Secretary before coming to secure employment.

PERSONAL EXPENSES for clothing, laundry, postage, books, etc., vary with different people. Berea favore plain clothing. Our climate is the best, but as students must attend classes regardless of the weather, warm wraps and underclothing, umbreilas and overshoes are necessary. THE CO-OPERATIVE STORE furnishee books, toilet articles, work uniforms, umbrellas and other necessary articles at cost.

LIVING EXPENSES are really below cost. The Coilege asks no rent for the fine buildings in which students live, charging only enough room rent to pay for cleaning, repairs, fuel, lights, and waching of bedding and towels. For table board, without coffee or extras, \$1.35 a week, in the fall, and \$1.50 in winter. For furnished room, with fuel, lights, washing of bedding, 40 to 60 cents for each person.

SCHOOL FEES are two. First a "DOLLAR DEPOSIT," as guarantee for return of room key, library books, etc. This is paid but once, and is returned when the etudent departs.

Second an "INCIDENTAL FEE" to heip on expenses for care of school buildings, hospital, library, etc. (Students pay nothing for tuition or services of teachers-all our instruction is a free gift). The Incidental Fee for most students is \$5.00 a term; in Academy and Normal \$6.00 and \$7.00 in Collegiate course.

PAYMENT MUST BE IN ADVANCE, incidental fee and room rent by the term, board by the half term. Instailmente are as follows:

Any able-bodied young man or young woman can get an education at Berea If there is the will to do so.

It is a great advantage to continue during winter and spring and have a full year of continuous study. Many young people waste time in the public echools going over and over the same things, when they might be improving much faster by coming to Berea and starting in on new studies with some of the best young men and women from other counties and
